AUTOMATIC BAGGING

Rollbag® Auto Bagging Systems

Rollbag systems are built for ease of use, reliability, and speed; they can be integrated with printing devices and automatic feeding systems. Rollbag automatic baggers are engineered to use poly tubing in addition to pre-opened bags. Choose from manually fed Rollbag models to fully automatic Rollbag bagging systems. Each can be equipped with a variety of options to match your unique bagging requirements.

Rollbag R3200 Automatic Bagger Make bags of different lengths with our bag maker assembly.

Rollbag Magnum Horizontal Automatic Bagger Reduce Dim Weight with the optional air expeller.

AUTOMATE YOUR BAGGING

Rollbag® Infeed Systems

Rollbag[®] feeding systems seamlessly integrate to Rollbag baggers to create an all-in-one bagging solution. Versatile Rollbag automatic baggers can serve as the center of a fully integrated manufacturing and packaging system. Rollbag infeed devices are perfect for counting and kitting small products to meet the most challenging packaging requirements.

Rollbag Weigh Count Sorting Table designed for seamless integration with the Rollbag R3200. Significantly increase your packaging rates with an infeed device!

> Rollbag Kit Conveyor, R3200 Automatic Bagger and Incline Outfeed Conveyor

ORDER FULFILLMENT

Poly or Paper Mailer Automatic Baggers

Rollbag automatic baggers for order fulfillment can use preopened bags on a roll or poly tubing. Poly tubing allows you to right-size the poly mailer to the product being packaged and results in a lower total packaging cost. Additionally, our Rollbag automatic baggers for poly mailers can print shipping information right on the bag or can be equipped with a label printer applicator. Rollbag R1285 with next bag out printing

Lower material costs & right-size the bag to the product with bag maker assembly. Rollbag R3200 and R3200XL Fulfillment baggers work with variable length poly tubing or pre-made bags.

Recycled materials available

Rollbag R3200 in stainless steel configured to label, fill, and seal curbside recyclable paper mailers.

MEDICAL AUTOMATIC BAGGERS

Rollbag medical auto baggers are offered in a variety of models to fit most medical bagging requirements. We manufacture automatic validatable medical pouch baggers that make bags of any length using Tyvek[®] with a chevron seal option. Output ports on all medical baggers allow the user to document the performance of the validation process.

Clamco 6800CS & 6800CS-XL Side Sealer

Efficiently create multi-packs while contents remain visible.

Package products with a variety of shapes and lengths at high speed!

Clamco brand automatic, high-speed, shrink packaging machines are as dependable as they are easy to operate. PAC manufactures a variety of L-Bar Sealers, Tunnels, Combos and One Step shrink units. Pair an L-Bar Sealer with a Clamco brand shrink tunnel for a complete shrink solution, or choose a Combo system with a sturdy L-bar sealer and powerful shrink tunnel. One Step units incorporate seal, trim, and shrink into a single operation.

Combination packaging units that seal and then shrink film around the package.

Shrink tunnels with high power and airflow for consistent shrink wrapped packages.

HORIZONTAL FLOW WRAPPERS

Packaging Aids brand Flow Wrappers are ideal for packaging products that must be packaged individually with high quality film at speeds of anywhere from 60–250 packages/minute. A flow wrapper is the preferred choice for everyone from small start-ups to large companies with higher speed wrapping requirements.

PAC FW 650SI Servo Box Motion Inverted Flow Wrapper for soft items.

PAC PVT SEALERS

Plus Med Vacuum Sealer

Nozzle style vacuum sealers are the most versatile method of vacuum packaging. We manufacture industrial vacuum sealers for food, coffee, electronics, medical, industrial, and even for hazardous classified areas. Machines are designed with multiple nozzles to seal multiple packages per cycle. PAC's industrial vacuum sealers can be equipped with gas flush for modified atmosphere packaging (MAP).

Fresh Pac Express Vacuum Sealer

Coffee Pac Vacuum Sealer

Extend sell-by dates when vacuum sealing with gas flush.

CHAMBER VACUUM SEALERS

Chamber vacuum sealers offer a high level of vacuum and consistency, with ease of use. This method of vacuum packaging is used when the highest level of vacuum possible is required (for example when packaging meat or cheese). Chamber vacuum sealer models vary from small tabletop units to large floor standing single and double vacuum chambers.

VMS Tabletop Vacuum Chambers

Ideal for restaurants, supermarkets, & food processors

Maximum air removal to protect electronics & parts during transport

VMS floor standing Vacuum Chambers

Multiple packages per cycle with highest level of vacuum.

Double Chamber Vacuum Sealer for increased production.

HEAT SEALERS

PAC Machinery offers heat sealers to fit a diverse range of applications.

Continuous Band Sealers

Band sealers with conveyors are used for virtually any application where fast, secure, hand-fed sealing is desired. Continuous band sealers come in horizontal and vertical styles. We also have tabletop continuous conveyor band sealers and medical band sealers.

Vertrod[®] Impulse Sealers

Vertrod heavy-duty thermal impulse heat sealers are known for their exceptional quality in a wide range of seal lengths. Vertrod sealers come in a range of configurations, including bar sealers, bag sealers, drop sealers, as well as compression sealers for applications that require the removal of air before sealing. Highly customized Vertrod sealers produce uniform, hermetic seals in a range of thermoplastic films, laminates, synthetics, and foams.

TED

Gain the PAC Advantage

***** More equipment choices

PAC Machinery offers more packaging equipment types than any other manufacturer. We will help you find the machine that works within your specifications, timeframe, and budget.

★ Experienced product specialists

Your equipment selection process will go smoothly because you have access to our experienced product specialist.

★ Equipment options & customization

If you need more customization for your unique application, our engineers can create the perfect solution. Our portfolio goes back decades, building machines for some of the world's most recognized companies, with unique packaging needs!

★ Experience live product demos

PAC has developed a web-based, LiveDemo[™] collaboration tool for product demos. Customers can view their product running on our equipment with the ability to discuss the process, ask questions and make adjustments in real time, virtually–from anywhere in the world.

Training and technical support

PAC Machinery offers equipment training both onsite or virtually once your equipment is installed. Our technical support can analyze PAC equipment and make recommendations for adjustments to optimize packaging performance.

★ Friendly customer service

Call us and find dedicated customer service to guide you through the equipment, materials, supply ordering and delivery process.
